PANEL GLIDE

features and benefits

- innovative Panel Glide is perfect for large windows and sliding doors
- simplicity in design with the panels gliding effortlessly for easy operation
- design integration with the sleek unobtrusive headrail creating a clean and crisp appearance
- some fabrics have been treated with **SANITIZED**[®] Antimicrobial Protection and **DURAGUARD**[®] Fabric Protector for greater stain resistance
- range of stacking options from left, right or split for movement and flexibility in high traffic areas
- cord free operation for child safety

Applications

- Any installation where heat, light and/or privacy control are required, e.g. offices, boardrooms, common areas, room dividers.
- Where child safety is paramount, wand operated Panel Glide offers a cord-free solution.
- Very wide windows. Panel Glide can span up to 5m with one track.

Colour Range

There are 17 ranges in the Panel Glide collection, with colours in each ranging from 5 to 20.

Energy Benefits

Window treatments that are tight fitting to the window and made from closely woven fabrics, provide one of the most effective ways to prevent heat transmittance through windows.

Quality

Hunter Douglas Limited, the supplier of the Hunter Douglas Commercial Panel Glide fabrics and components, is a quality endorsed company, certified as complying with the requirements of AS/NZS ISO 9001:2000.

Australian Made

Most Hunter Douglas Commercial Fabrics are woven and coated in Australia. Hunter Douglas Commercial Panel Glide is made to measure in Australia.

Fabric Specification Overview

All Hunter Douglas Commercial Panel Glide fabrics are 100% polyester or polymer coated glass fibre Sunscreen fabrics. Many are treated with **DURAGUARD**[®] Fabric Protector and **SANITIZED**[®] Antimicrobial Protection.

MULTIVISION[®] Concept

MULTIVISION[®] is a group of fabrics that are perceived to be the same colour tone, but have different opacities. A number of fabric colours have been selected for the MULTIVISION[®] Concept. For more information refer to the Hunter Douglas Commercial MULTIVISION[®] Brochure.

Hardware Specification Overview

Hardware is constructed from extruded aluminium sections and hard-wearing UV resistant plastics. A choice of cord or wand operation is available.

DURAGUARD[®] Fabric Protector

All Hunter Douglas Commercial Panel Glide fabrics are coated with **DURAGUARD**[®] Fabric Protector which effectively repels most stain causing agents with its proven, water based, fluorochemical formula. This fabric protection is totally invisible and has high levels of stain repellence. It makes cleaning and maintaining the fabric much easier.

WINDOW COVERINGS

Elite System

The Elite System, available exclusively as part of the Hunter Douglas Commercial range, is the premium Panel Glide Track System, offering whisper quiet operation and technical features that ensure operation with the lightest touch.

Product Features

- Fabric panels are attached to a simple headrail system using roller mounted carriers. Extremely smooth to operate even on large blinds.
- The fabric panel is applied to the headrail using a spline to ensure clean, sleek lines and to eliminate fabric puckering.
- The headrail is available with 2, 3 or 4 track channels. As a result blinds can be manufactured with 2, 3, 4, 5, 6, 7 or 8 panels.
- Panels are always equally spaced with an 80mm overlap to minimise light gaps.
- The electro-coated aluminium headrail is available in two colours – White Birch or Natural Aluminium.
- Connecting Joint Rollers are fitted with the Elite Bottomrail option for added stability.

Elite Track Construction

The Elite headrail is an extruded aluminium alloy section in either a clear or electro-coated finish. The headrail height is 28mm and the depth varies between 45mm and 178mm depending on the number of channels required.

Panel Finishing

3 options available:

Traditional finish with welded pocket and aluminium bottom lathe (A).

Ellipse bottomrail (B).

Elite bottomrail (includes Joint Roller for added stability in doorways) (C). Only available with the Elite track.

Operation

Cord or Wand operation is available.

Dimensions

Minimum Panel Width (mm)	500
Maximum Blind Width (mm)	1000
Minimum Drop (mm)	1000
Maximum Panel Width (mm)	varies by fabric*
Maximum Blind Width (mm)	5000
Maximum Drop (mm)	4000
Shade Stack Width	Width of Panel

*Maximum panel width varies by fabric. Please consult your Hunter Douglas Commercial representative for exact dimensions.

Channel Dimensions

No. Channels	(mm)
2 Channels	45w x 28h
3 Channels	65w x 28h
4 Channels	88w x 28h
5 Channels	111w x 28h
6 Channels	132w x 28h
7 Channels	155w x 28h
8 Channels	178w x 28h
