August 2008

Hunter Douglas Commercial Sunscreens: New colour, new texture

Hunter Douglas Commercial introduces a new colour palette for their **ECOVIEW® Plus** and **EXTRAVIEW® Plus Sunscreen Fabrics** to now include several darker colours that meet the Green Star requirement of light transmission of less than 10%. When connected to a Building Management System with manual override, these particular fabrics contribute points to the IEQ-4 Daylight Glare Control Green Star assessment for buildings specified by the Green Building Council of Australia.

In consultation with a colour trend expert, the new colour palette consists of 18 colours for Ecoview Plus and 20 colours for Extraview Plus fabrics. The earth-coloured range has a unique texture, optimising the current trend for earthy, textured fabrics.

Hunter Douglas Commercial Sunscreen Fabrics feature a fibreglass core and a PVC coating for excellent solar optical properties – including heat protection, shade factor, glare reduction and UV protection. By reducing the level of light and heat transmitted into a building, Hunter Douglas Commercial Sunscreen Fabrics can significantly reduce energy costs by decreasing the burden on internal heating and cooling operating systems.

Woven in Australia, Hunter Douglas Commercial Sunscreen Fabrics are a very stable product due to the glass core. The PVC coating is controlled with micro precision, ensuring perfect regularity of the fibre and guaranteeing both transparency and sharpness of view. All colours meet Australian standards for colour fastness and also meet General Requirements of the Building Code of Australia for fire retardancy, making both Ecoview Plus and Extraview Plus suitable for residential and commercial applications.

For commercial applications with extra large windows Extraview Plus and Ecoview Plus fabrics are now available in three metre widths.

Developed and designed in Australia is the new **Ellipse Rail Balance** which **features a sound proofing bumper** with a 60% increase in weight, the new rail ensures your sunscreen fabric hangs and rolls very straight – meaning your sunscreen product looks great and lasts longer.

For further information on this exciting new product contact Hunter Douglas Commercial on 1300 651 968 or visit www.hunterdouglascommercial.com.au.
