

NEW

SUNRAIN® AWNING

features and benefits

- protection for rain and shine
- front rail drainage allows water to escape from either side
- pvc fabric provides complete rain protection
- retractable awning
- 20 colours available
- great range of accessories

The Hunter Douglas Commercial SUNRAIN® Awning provides protection from the elements - rain or shine. With its unique double pitch design, water runs off the smooth PVC fabric and drains out both sides of the front rail. With a variety of accessories, the Hunter Douglas Commercial SUNRAIN® Awning provides a range of options to suit all needs.

Design

The SUNRAIN® Awning has been designed and developed in Germany. This quality product traverses functionality and aesthetics to deliver the best in folding arm awning rain protection.

Pitch Angle

The standard pitch angle is set to 5 degrees to allow water run off, additional pitch options range up to 15 degrees from Square Bar to Middle Stringer. This option allows you to determine pitch placement to best accommodate your sun control needs.

Fabrics

The specially designed, light weight, SUNRAIN® PVC fabric provides complete rain protection. With a huge selection of 20 colours, these fabrics are certain to suit the exterior of any building.

Middle Stringers

The unique Middle Stringers brace the arm at the flexing point providing extra strength and stability when the awning is fully extended. It also keeps the fabric pushed up and taught ensuring minimum fabric bagging.

WINDOW COVERINGS

Front Rail Drainage

Provides excellent drainage for water run off, allowing water to escape from either side of the front rail awning, keeping the area beneath dry.

The awning has been UV tested for the Australian climate and is colourfast.

Square Bar

Allows easy installation with a variety of mounting options ideal for any outdoor area.

Optional Accessories

Rain Hood

The sleek, colour co-ordinated, solid aluminium rain hood provides protection for fabric keeping it clean and also provides rain protection over doorways and windows.

Variable Valance

By being able to adjust the height of the retractable valance users can vary the shading to suit the sun's position. The valance can double as a straight drop to provide shading and privacy even when the awning is retracted.

Wind Protect System

This system allows the awning to withstand up to 65kmph winds when fully extended by stabilising the front rail. Its telescopic poles make removal and storage easy.

Infra-Red Heating

Optional heating allows for comfort and ambiance to be created in any outdoor area. Infra-red heaters do not heat the air, but rather bodies and objects economically and effectively.

Operating Options

Including manual and motorised operating systems with optional sun and wind sensors.
